Ruby van der Bogen

Ruby van der Bogen is a mythical creature researcher. Fantasy worlds are her home. Like a mermaid she dives under waves, like a unicorn she gallops through rainbows, like a monster she eats melons and notices how many similarities humans and mythical creatures have. In her books, she reveals the most exciting and fun facts that she was able to discover during her research. She is advised by children who know her by her human name, Sarah Janke.

Alexandra Helm

Alexandra Helm was born in Offenbach am Main and grew up surrounded by many children's books, thanks to her parents. She started drawing in kindergarten and studied graphic design with a focus on illustration at the University for Design in Offenbach a few years later. In 2015, she started her own business as an illustrator.

Illustrating children's books makes her jump out of bed in the early morning and her feet wiggle happily as she works.
